ABOUT US

Our Amish shed builders are located straight from Lancaster County. We are passionate about designing and building structures that meet your requirements. Our company builds and installs our products in many designs, materials, sizes, and customizations. Its not one size fits all. We develop what you desire, how you desire it. Custom-made Structures at Low Prices- Here's How We Do It. We build every wood, vinyl and garage shed, chicken coop, and custom-made structures. We also work closely with our vendors to secure the best quality at reasonable prices. We use our 30 years of experience to minimize waste and maximize savings. We Safeguard Exactly what is essential to You. We take pride in building top quality structures that will last for years to come.

OUR QUALITY

Our Amish shed builders are located straight from Lancaster County. We are passionate about developing our wide range of structures built according to your requirements. Our company builds and installs our products in many designs, materials, measurements, and personalizations. Its not one size fits all. We build what you desire, how you desire it. Custom-made Structures at Low Rates- Here's How We Do It. We produce every wood, vinyl and garage shed, chicken coop, or custom-made structures. That means there is no middleman. Without the intermediary, we save a great deal of cash on overhead expenses and pass the additional cost savings onto our clients. We Safeguard Exactly what is essential to You. We take pride in building quality structures that protect what is essential to you.

UPGRADED SHED MODELS

KOUNTRY SHED

10x12 Kountry

- Light Gray Painted Siding | White Trim | Dark Gray Doors and Shutters | Dark Gray Shingles

The common idea when you think of a shed is a dull box-like structure, which sits in your backyard and never fits it's surroundings. Thanks to the modern times, sheds have refurbished themselves into a more stylish and appealing look.

The main difference from basic models to upgraded models:

- Steeper pitch roof than the basic models which have 5/12 pitch to 6/12 pitch
- Upgraded models have from 6/12 pitch to 12/12 pitch
- And also have different size walls depending on model shed
- Larger gable overhangs - miratec corners - 2=24x36 windows with window trim and shutters - arch vents
- Z style shutters or vinyl shutters - 3 runners on 8' wide buildings - 12" antique style hinges.

Upgraded shed models doors come with arch trim on the top part of door heavier built doors. All models available in wood or vinyl siding.

CEDAR SHED MODELS

BOARD AND BATON

12x20 Board and Baton

- Board and Baton Siding and Optional Cedar Shingle Roof

Cedar is the best wood for the job, strength being the best reason!

Cedar is a hard wood that has fibers that are very straight. Therefore, this wood is very durable and holds up well in extreme weather. Its lightweight and lasts for years. It also is a favorite choice for outdoor furniture makers. Cedar is also a popular choice for decks, siding and shingles. In fact, you could build your entire shed out of cedar.

CEDAR SHIPLAP WORKSHOP

PAD PREP AND DELIVERY

Storage Shed Pads and Garage Gravel Pad Preparation

Preparing for your storage shed is an important procedure. We recommend placing your shed on a storage shed pad as outlined below. Choose between a gravel pad for your shed or a concrete pad for a shed or garage. On larger two, three or four car garages and two-story buildings we provide directions on preparing a concrete pad. Ask us for pricing on our stone and concrete foundations. Please follow the storage shed pad or car garage pad instructions as outlined and as always, feel free to call or email us at if you have any further questions.

Follow These Instructions For Storage Shed Pad Preparation with a Gravel Pad

1. Measure the Space for your Building

Please ensure that our "MULE" can bring the shed fully assembled into your backyard (if the area is tight, please request a "built on site" shed)

2. Build a Perimeter for Your Storage Shed

Build a 4'x4', 4'x6' or 6'x6' pressure treated perimeter approximately 18 inches wider and longer than your shed. The STONE AREA of your SHED PAD should be at least ONE FOOT WIDER and ONE FOOT LONGER than the actual size of the building.

3. Fill in With Stone

Fill the area inside the frame with 4-6 inches of 3/4 INCH CRUSHED STONE - DO NOT USE RIVER BEAD STONE or a SMOOTH ROUNDED STONE!!

4. Check for Level

Please MAKE SURE that the pad is PERFECTLY LEVEL and SQUARE.
